

CADISON® India Users Conference - 2018

Neilsoft Ltd. Hosted the Successful CADISON India Users Conference (CIUC) 2018

The CADISON India Users Conference 2018 was held on 13th & 14th December in Pune, India. Every year Neilsoft Ltd. organizes this event for the CADISON users; the objective of the CIUC 2018 was "Building Customer Success Platform". Building Customer Success platform has been a journey all the way through 20 years of development of our engineering solution for plant industry. The focus of this event is to meet our esteem customers and let them know what all the new advancements are being introduced in the new release of CADISON and how to use CADISON in a better way to gain maximum productivity and efficiency.

We started CIUC 2018 event with an introduction of new features in CADISON R18, the major focus of CADISON R18 was on improving usability, better User Interface (UI) for easier Project Cost Estimation, 3D Designer Enhancements, enhanced or improved Catalog(s) creation & management and some new important features in Electrical Designer. We have also further enhanced the configuration and customization capability in R18. We also launched CADISON WORLD – Issue 2018 with new customer case studies, all added features in release R18, and how BIM is evolving at a greater pace and being embraced by Plant Industry for Lower Risks, Improved Margins and Faster & Better Project Delivery.

We would like to thank all the CADISON Users for attending this conference and made this event a huge success. The launch of CADISON World and our CIUC event was highly appreciated by our customers. They also shared their experiences on how CIUC has been shaping their businesses with better understanding and implementation of CADISON, to become more competitive and to maintain their niche edge in the market.
